

ECLIPSE CROSS

**MITSUBISHI
MOTORS**

Drive your Ambition

ECLIPSE CROSS

BUILT FOR WHEREVER NEXT

Striking design crosses paths with cutting edge technology to deliver a bold adventure vehicle that takes you beyond the everyday.

The Eclipse Cross redefines the crossover landscape, Super All Wheel Control ensures every corner is hugged, while a turbo charged petrol engine delivers next generation performance and economy.

Designed to impress, built to drive, the stunning Eclipse Cross is engineered to shine in every department every time you get behind the wheel.

ECLIPSE CROSS, BUILT FOR THE TIME OF YOUR LIFE.

Since 1917 Mitsubishi Motors has been at the forefront of technological innovation. Having launched the inventive Super-Select 4WD system and the world's first Plug-in hybrid electric SUV, our vehicles have been tested, trialled and triumphant in some of the earth's toughest terrain including the Dakar rally. These engineering milestones, together with our commitment to reliability and ingenuity sets us apart. As we continue to move forward, pushing the boundaries of innovations, you can rest assured your Mitsubishi has been built for the time of your life.

Eclipse Cross, the next generation of the ever-reliable Mitsubishi SUV range.

ECLIPSE CROSS

BUILT FOR CITY LIGHTS

Conveying subtle confidence, the all new Eclipse Cross brings the SUV into the modern age, combining the latest styling design with incredible driving dynamics and innovative, intuitive safety technology.

The Eclipse Cross makes a bold statement on the road. A muscular profile and distinctive LED rear lighting reflect its individuality.

Black contrasts on the dynamic 18" alloy wheels create a sophisticated balance of sport and style.

Dual panoramic sunroofs* bring the outside in. The powered front section opens like a traditional sunroof, while both the front and rear sun blinds can be opened or closed to let in light and breath-taking views of the sky.

Privacy glass on the back and rear windows help prevent unwanted attention while protecting your passengers against UV rays.

Enjoy unobscured vision with front wipers that activate automatically when moisture is detected on the windscreen.

And as darkness falls, dusk sensing headlamps automatically illuminate in fading light or when travelling through a tunnel.

*Exceed models only.

ECLIPSE CROSS

STYLE WITH PURPOSE

Experience complete style and comfort with bolstered seats that provide relaxed driver support and unchallenged visibility. Instantly elevating the drive, Exceed models offer the extra luxury of leather seat facings, power adjusted driver's seat and heated driver and front passenger seats.

It's also clever when it comes to creature comforts, which extend to every passenger in the spacious cabin. Supportive contours and plenty of legroom keep everyone feeling refreshed even on the longest of journeys.

Rear seats feature 8-step reclining and sliding adjustments to create additional legroom or optimised cargo space. The 60:40 split fold rear seats provide added flexibility.

Exceed AWD model shown.

Exceed AWD model shown.

ECLIPSE CROSS

BUILT FOR THE DRIVE OF YOUR LIFE

The sporty, meticulously crafted cockpit of the Eclipse Cross quickens your pulse and heightens your driving experience. Next generation technology and connectivity enhance driver awareness and control, delivering a more intuitive response to your every command.

A beautifully sculptured leather wrapped and piano black steering wheel and leather wrapped shift lever all add to the overall feel of comfort and control.

A large liquid crystal Multi-information display in the centre of the meter panel keeps you clearly informed of the vehicle's status, including trip, external temperature, fuel economy and more.

Eclipse Cross is fitted with 7 SRS airbags including driver and front passenger, side and curtain airbags and driver knee airbag. Designed to stabilise your lower body and knees during certain types of frontal collisions, the driver knee airbag provides an extra level of protection when you need it most.

Exceed AWD model shown.

ECLIPSE CROSS

EXHILIRATION MEETS EXCEPTIONAL

The Eclipse Cross interior is a triumph in modern utilitarian design, with new generation technology elegantly framed inside a striking, beautiful interior cabin.

SMART KEY AND ONE TOUCH START

Allows you to unlock the doors and open the tailgate and even start the engine with one touch of a button, all while your keys are safely tucked away in your pocket or bag.

HEAD UP DISPLAY*

The Head Up Display in Exceed models conveys vehicle information in full colour above the instrument panel for easy viewing. You can adjust image brightness and display height to suit your preference and time of day. The Head Up Display can be set to extend or retract when you turn the ignition on or off.

SMARTPHONE LINK DISPLAY AUDIO (SDA)^

A true extension of your smartphone via Android Auto™¹ or ApplePlay™². Connected to a 7" touchscreen, you can access your phone's compatible apps and get directions, make calls, send and receive messages and listen to music from any source including DAB+ radio. With a smartphone storage tray and USB connectors in the centre console, everything is taken care of.

TOUCHPAD CONTROLLER

Located next to the shift knob on the centre console it offers the convenient, simple and intuitive operation of the Smartphone Link Display Audio system without having to move your body position while the car is on the move.

ELECTRIC PARKING BRAKE WITH BRAKE AUTO HOLD

Simply pull the switch up to apply the parking brake or push the switch down to release it. While stopped, Brake Auto Hold keeps the vehicle stationary even if you release the brake pedal. Pressing the accelerator then releases the brake.

AUTO DIMMING REAR VIEW MIRROR*

Automatically reduces glare from headlights of cars behind you to maintain a clear view and support safer driving.

*Exceed model only. ^Smartphone Link Display Audio (SDA) supports Android™5.0 or higher/iOS 8.0 or higher for use with Android Auto™/ApplePlay. Smartphone Link Display Audio will not operate in areas with no service signal and may not operate in supported areas where the signal is weak. Users are responsible for all charges incurred using smartphones and iPhones to connect to Android™ and CarPlay respectively. Some functions may not be available for use depending on the user's location. Android Auto™ is not available through Touchpad Controller function. Only compatible Apps can be used. 1. Android™ and Android Auto™ are trademarks of Google Inc. 2. Apple CarPlay and iPhone are trademarks of Apple Inc., registered in the US and other countries.

ECLIPSE CROSS

SHINE IN ALL CONDITIONS

The Eclipse Cross inspires complete confidence in challenging environments. Whether navigating winding roads or snowy conditions, the Super All Wheel Control (S-AWC)[#] system supplies optimal torque to the wheels for enhanced vehicle dynamics, stability and control.

S-AWC integrates with Mitsubishi's proprietary Active Yaw Control (AYC), which uses braking to optimally distribute torque to the left and right rear wheels. Even if you unintentionally brake or accelerate too hard around a snow-covered turn, you can maintain control without extra steering effort.

You can select the AUTO, SNOW or GRAVEL drive mode depending on road conditions to enhance turning accuracy, straight-line stability and manoeuvrability on slippery roads. An indicator in the instrument panel keeps you informed of S-AWC status at all times.

Handling is stable, intuitive and predictable. Wherever you point, the Eclipse Cross goes with unerring precision and poise thanks to a fine-tuned suspension, responsive steering and supreme body rigidity. At the same time, all passengers enjoy an extremely comfortable ride on every road, wherever you travel.

AUTO MODE

Optimal performance for everyday use.

SNOW MODE

Enhances stability on slippery road conditions.

GRAVEL MODE

Superior handling on rough roads for maximum control.

[#]Exceed AWD model only.

ECLIPSE CROSS

1.5L DIRECT-INJECTION TURBO-CHARGED PETROL ENGINE

Optimised for fuel efficiency and turbo-charged for performance. The newly developed MIVEC engine puts instant acceleration at your command. Developing an impressive 110kW of power and 250Nm of torque for highly responsive performance.

PADDLE SHIFTERS

Mounted within easy reach, the paddle shifters allow you to enjoy Sports Mode while keeping both hands safely on the wheel. Shifting is quick and easy, with the current gear position clearly shown on the multi-information display.

INTELLIGENT TRANSMISSION

Eclipse Cross is available with a continuous variable transmission (CVT) that provides smooth, powerful acceleration and outstanding fuel efficiency. For hands on control, 8-speed Sports Mode creates the satisfying sensation of shifting gears.

ECLIPSE CROSS

Looking after everything you hold precious is our number one priority. Mitsubishi's RISE rigid occupant cell absorbs and dissipates energy away from you in the event of a crash, and with a maximum ANCAP safety rating of 5 stars, your Eclipse Cross provides the ultimate in safety.

**BUILT FOR
PEACE OF MIND**

Ultrasonic misacceleration Mitigation System (UMS)*¹

The Eclipse Cross Exceed's Ultrasonic misacceleration Mitigation System reduces the chance and severity of hitting obstacles 4m in front or behind a vehicle when a driver mistakenly presses the accelerator when stationary or at speeds of up to 10km/h.

Rear Cross Traffic Alert (RCTA)*³

Rear Cross Traffic Alert system helps detect a moving vehicle when reversing. It alerts you via a buzzer sound, and an indicator light appearing in the combination meter and a blinking light in the side door mirror.

Active Traction Control (ATC)

Active Traction Control helps Eclipse Cross maintain traction on most slippery or rugged surfaces. ATC automatically controls the engine's output – so driving wheels are prevented from spinning. Sensing loss of traction in independent wheels, ATC applies braking force to that particular wheel and sends extra power and torque to other wheels with traction, to keep the vehicle moving and in control.

Active Stability Control (ASC)

Active Stability Control intuitively recognises when you over-steer or under-steer and applies brake force to appropriate wheels to keep you stable through corners.

Multi Around Monitor*

Mitsubishi Eclipse Cross Exceed's Multi Around Monitor provides a 360° birds-eye view of your car. The views from cameras mounted on the front, rear and sides of the vehicle (including birds-eye view) can be displayed in various combinations to reveal what is in blind spots and help you park more safely.

Forward Collision Mitigation (FCM)*⁴

Mitsubishi's Forward Collision Mitigation system offers extra peace of mind. It detects obstructions ahead and issues a visual and audio alert when there is danger of collision, automatically applying the brakes to avoid collision or reduce impact.

Adaptive Cruise Control (ACC)*

Your Eclipse Cross has the latest intuitive technology to help guide you on the road. Adaptive Cruise Control uses radar technology to detect any cars in the lane ahead and adjusts the speed of your car accordingly while maintaining a safe distance set by you.

Lane Departure Warning (LDW)

Lane Departure Warning uses a camera to issue an audible alert and shows a warning on the multifunction display if your vehicle drifts from its lane while the turn signals are not operating.

Blind Spot Warning (BSW)* and Lane Change Assist (LCA)*²

Change lanes with confidence with Eclipse Cross Exceed's Blind Spot Warning system. In addition, the Lane Change Assist system sounds an audible alert and displays a blinking warning in the door mirrors when the system detects a high collision probability with a vehicle coming from behind moving to the same direction within 3.5m from Eclipse Cross's side or 70m from its rear bumper.

Hill Start Assist (HSA)

Steep city streets or congested shopping mall ramps are no longer a problem with Eclipse Cross' Hill Start Assist technology. It prevents the car from rolling backwards by maintaining braking force to give you time to move your foot from brake to accelerator.

Electronic Brakeforce Distribution (EBD)

Electronic Brakeforce Distribution works hand-in-hand with Eclipse Cross's ABS computer to assess load and distribute braking force between the front and rear wheels. When you have a load in the rear, it helps you stop in a shorter distance than with standard brakes.

Anti-lock Braking System (ABS)

Eclipse Cross is equipped with an Anti-lock Braking System which allows the driver to maintain steering control of the vehicle and manoeuvre around obstructions in heavy braking situations.

*Exceed models only. Please drive safely and never rely solely on these systems while driving. 1. Ultrasonic misacceleration Mitigation System (UMS) may not activate in some conditions. The engine output control activates when driving; 0-10km/h (not in N or P Position); obstacle/vehicle is within approx. 4m range; accelerator pedal is pushed hard or abruptly; driver is not turning to avoid obstacle/vehicle. The detection and control capabilities of UMS are supplementary only and do not prevent misacceleration in every situation. 2. The detection and control capabilities of BSW and LCA are supplementary only and do not warn you of vehicles in blind spots in every situation. BSW and LCA may not activate in some situations. 3. Do not rely solely on this system, which may not detect all moving vehicles in certain conditions. Drivers are fully responsible for their own safe driving. Please drive safely and never rely solely on these systems while driving. 4. The detection and control capabilities of FCM are supplementary only and do not prevent collisions in every situation. Please read the operation manual carefully and be aware of these limitations.
